Changes on site

When the job turns out bigger, offer the customer a new version of the Quote from the job.

Steps

1. Open the job and press The job got bigger.
2. Add what is needed now.
3. Press Offer another version. The customer reads it and accepts it before you carry on.

Good to know

The first Quote is kept exactly as it was. Every version is on the job, so nobody argues later about what was agreed.
