Your number on Google

If you have a Google Business Profile, change its phone number to your HQ number so callers reach HQ.

Steps

1. Open Setting up and go to the Google step.
2. Sign in to Google Business Profile in another tab and change the phone number to your HQ number.
3. Come back and press I’ve changed it, or I don’t have a Google listing.

Good to know

HQ cannot change anything at Google for you. The step only records what you did, so Ready to go live can show it.
