Languages: yours, your company’s and each customer’s

HQ speaks eight languages. Each person reads HQ in their own, and each customer is written to in theirs.

Steps

1. To read HQ in your own language, press your initials at the top right and choose it under Language.
2. To set the language your company writes in, open Configure, then Languages, and pick it beside This company writes in.
3. Each customer is written to in the language they write in. To correct one, pick another language beside their name on the same page.

Good to know

The eight languages are English, Spanish, French, German, Portuguese, Hungarian, Chinese and Tagalog.

The safety rules and the word to stop texts work in every one of them.
