# On-call

The on-call rotation says who is woken for an emergency out of hours.

## Steps

1. Open Technicians, then On call.
2. Set the rotation: who is on call, and for which days and times.
3. Save it. The Team board shows who is on call right now.

## Good to know

An emergency out of hours tells whoever is on call. If nobody is on the rotation, the office is told instead.
