Booking a job by phone

Take a job by phone uses the same booking as a text, so a phoned-in job is treated the same as any other.

Steps

1. Open Take a job by phone.
2. Find the customer or add them, and write what they need in their words.
3. Press Find times, pick one with the customer, and press Book it.

Good to know

If the customer has not agreed to texts, nothing is texted to them. Read them the consent question on the phone if they want updates by text.

The times list the nearest free technician first, with about how much driving each one adds.
