# Setting up by talking to Orsa

Instead of the setup pages, you can tell Orsa about your company in your own words, typed or spoken.

## Steps

1. Open Setting up and choose Just talk to Orsa.
2. Talk about your business as long as you like: what you do, where, when you are open, what you charge.
3. Orsa turns what you said into cards, one per setting, and asks about anything still missing.
4. Read each card and press Save on the ones that are right. Nothing is saved until you do.

## Good to know

You can switch back to the setup pages at any time. Anything you saved by talking shows there too.

Prices are written down exactly as you said them. HQ’s price book does any arithmetic, never the AI.

Everything you save is recorded under your name in the history of changes.
