Talking instead of typing

Press Speak once and say what you want. Orsa sends it when you stop talking and answers in writing.

Steps

1. Open Ask Orsa and press Speak once.
2. Say your question or what you want done. Your words appear as you speak, and it sends them when you stop.
3. Read the answer. Press Speak again for the next question. A change still waits for Confirm.

Good to know

Speech is turned into words by your phone or browser. The sound itself never reaches HQ.

To hear answers read aloud too, turn on Read Orsa's answers aloud in Your profile, under your initials.
