A technician’s day on the phone app

Technicians work their day from the HQ app on their phone: today’s jobs, directions, photos and the end-of-day report.

Steps

1. Open the app to see Your day: the next job, the rest of the day, and the drive between.
2. Accept or decline jobs offered to you.
3. On each job, tap on my way, arrived, started and finished. The office sees it as it happens.
4. Take before and after photos. They send themselves when you have signal.

Good to know

Turn alerts on for your phone to be buzzed when a job is offered or changes.

You can ask Orsa from the app too: "What’s my next job?" or "Mark me finished."
