What the AI sees, and your privacy

The AI is shown only what it needs for each job, and only what the person asking is allowed to see.

Steps

1. To read a question, the AI sees the sentence, not your records.
2. HQ's own code then reads your records through your own account, with your own permissions.
3. Orsa answers in your own language, from what HQ already holds.

Good to know

AI conversations with Orsa are kept for a year, then forgotten. You can forget one sooner from the panel.

Each company can switch AI features off in Features.
