Your profile and notifications

Everything about you, in one place under your initials: your name, photo, sign-in, language, look, start page and what reaches you.

Steps

1. Press your initials at the top right, then Your profile.
2. Change what you want and press Save. A new email is used once you open the link sent to it.
3. Under Notifications, tick where each kind reaches you when HQ is closed: this phone, a text or an email.

Good to know

The bell always has everything. Phone, text and email are each off until you turn them on.

Less movement keeps HQ still: nothing slides, and the bell does not swing.
